

### **modern computer architecture by pdf**

In computer engineering, computer architecture is a set of rules and methods that describe the functionality, organization, and implementation of computer systems. Some definitions of architecture define it as describing the capabilities and programming model of a computer but not a particular implementation.

### **Computer architecture - Wikipedia**

The von Neumann architecture“also known as the von Neumann model or Princeton architecture“is a computer architecture based on a 1945 description by the mathematician and physicist John von Neumann and others in the First Draft of a Report on the EDVAC.
