Systems Modeling Language (SysML) Tutorial

In statistics, a power law is a functional relationship between two quantities, where a relative change in one quantity results in a proportional relative change in the other quantity, independent of the initial size of those quantities: one quantity varies as a power of another. For instance, considering the area of a square in terms of the length of its side, if the length is doubled, the ...

Aerodynamics, from Greek $\alpha\epsilon\rho\omicron$ aer (air) + $\delta\upsilon\lambda\alpha\mu\iota\kappa\omicron$ (dynamics), is the study of the motion of air, particularly its interaction with a solid object, such as an airplane wing. It is a sub-field of fluid dynamics and gas dynamics, and many aspects of aerodynamics theory are common to these fields. The term aerodynamics is often used synonymously with gas dynamics, the difference being ...

USE OF CFD IN DESIGN 2 INTRODUCTION An overview of the general steps required for all CFD analyses (with mixer example) These preliminary concepts will then be reinforced through the solution of a simple" CFD model.

Use of CFD in Design: A Tutorial - Porter McGuffie, Inc

Variable Speed Pump Selection - Parts 1 - 3 This tutorial takes a different approach to pump selection for VFD operation. Part 1 addresses constant pressure / variable flow while Part 2 addresses variable pressure / variable flow.
